

SAI DURGA VENKATESH N

Senior QA Automation Engineer | SDET | Test Automation Architect

 (+91) 8121900283 |  Saidurgavenkateshnimmakayala@gmail.com |  Hyderabad, India |  LinkedIn

PROFESSIONAL SUMMARY

Senior QA Automation Engineer with 4.9+ years of experience building and leading test automation across UI, API, and AI/LLM evaluation domains. Expert in architecting scalable frameworks using **Katalon Studio**, **Selenium**, **Playwright**, **Python**, and **DeepEval** with deep proficiency in **Azure DevOps CI/CD pipelines**, REST API testing, and scriptless XML-based automation. Currently driving end-to-end quality engineering for EY's enterprise platform, delivering 60%+ regression effort reduction and 40% faster test development. Skilled in PowerShell-based pipeline automation, stakeholder reporting, and cross-functional Agile collaboration.

TECHNICAL SKILLS

Languages	Python, Java, MySQL
Automation Frameworks	Katalon Studio, Playwright, Selenium WebDriver, Page Object Model (POM), XML-based Scriptless Framework
CI/CD & DevOps	Azure DevOps, Azure Pipelines (YAML), Jenkins
AI/LLM Testing	DeepEval, Safety Metrics (Bias, Toxicity, PII Leakage)

PROFESSIONAL EXPERIENCE

Senior Quality Engineer

Jan 2025 – Present

LTIMindtree — Client: Ernst & Young (EY)

Hyderabad, India

EY Internal Control Testing (ICT) — GeniAus Platform

Tools: Python, Playwright, Selenium, Azure DevOps, REST API, DeepEval, PowerShell

Enterprise-grade internal controls testing platform leveraging AI-driven technologies to streamline audit processes for EY's global clients.

- Designed and configured **multiple specialized AI/Copilot agents** (Test Case Generator, Page Object Creator, App Module Reuse, Test Suite Manager, Failure Analyzer, and Scriptless Knowledge Assistant) integrated with **Azure DevOps REST APIs** to auto-generate XML test scripts, page objects, and reusable app modules from ADO User Stories and Test Case IDs — standardizing automation across **AMSAI, KAC, ICT, and QRM** modules and accelerating test authoring by **70%**.
- Built a **Playwright automation framework** with Page Object Model architecture, Allure reporting, multi-browser support (Chromium, Firefox, WebKit), auto-wait capabilities, network interception, and visual regression testing, fully integrated with Azure DevOps CI/CD pipelines.
- Architected a **scriptless XML-based test automation framework** with three pillars — UI (Playwright), API (REST), and AI/LLM evaluation (DeepEval) — featuring dynamic Page Object Models, parameterized XPath locators, and reusable app modules; developed **400+ automated test cases** achieving 60%+ reduction in manual regression effort.
- Engineered **REST API automation suites** with JSON schema validation, bearer token authentication, and **Azure DevOps integration** to auto-generate test scripts from ADO work items and publish real-time results; implemented **DeepEval-based AI evaluation pipelines** with safety metrics.
- Engineered **end-to-end Azure Pipelines (YAML)** with matrix execution strategy, automated dependency management, artifact publishing, Git-based historical result tracking, **PowerShell-driven KPI extraction** (pass/fail/skip percentages, Health Index, maintenance analysis), and **SendGrid-powered email reports** with inline donut chart visualizations (matplotlib) and historical trend tables delivered to stakeholders after each run.

Infosys Limited

Hyderabad, India

Raymond James Financial Inc — Investment Banking Platform

Tools: Katalon Studio, Selenium, GitHub, JIRA | Dec 2023 – Jan 2025

Multinational independent investment bank providing financial planning, investment management, and advisory services.

- Designed and executed **automated test scripts** using Katalon Studio for financial planning and investment management modules, ensuring **regulatory compliance** with industry standards.
- Drove comprehensive **regression, functional, integration, and smoke testing** after each sprint release, achieving consistent defect identification and documentation for timely resolution.
- Actively participated in **Agile ceremonies** (sprint planning, daily stand-ups, sprint reviews) with cross-functional onshore and offshore teams.
- Prepared and presented **test execution reports** to clients with quality metrics, defect trends, and test coverage analysis; managed **defect lifecycle in JIRA** from triage to closure.

Hillenbrand (Batesville) — Supply Chain & Product Management

Tools: Katalon Studio, Selenium WebDriver, JIRA | Oct 2021 – Dec 2023

Leading manufacturer of funeral service products with supply chain and product management systems.

- Executed **end-to-end test automation** using Katalon Studio and Selenium WebDriver across product management, supply chain, and user management modules.
- Performed **test case design, manual testing, defect tracking**, and automated regression execution with JIRA-based bug lifecycle management.
- Authored **test plans, test strategy**, and RTM documents aligned with business requirements and acceptance criteria.
- Partnered with the development team on **bug triaging and feature development**, reducing defect escape rate through **shift-left automated testing**; led **knowledge-sharing sessions** on testing strategies and framework best practices.

EDUCATION**Bachelor of Technology (B.Tech), Computer Science & Engineering****2021**

Kakinada Institute of Engineering and Technology (KIET), Korangi, Andhra Pradesh, India

KEY ACHIEVEMENTS

- Architected a **Playwright automation framework** from scratch, enabling non-technical team members to author test cases via AI Agents and reducing test creation time by **50%**.
- Automated **end-to-end Azure DevOps integration** to auto-generate test scripts from ADO work items, eliminating **60% of manual test case authoring effort**.
- Engineered a **full CI/CD pipeline ecosystem** with YAML-based Azure Pipelines, PowerShell KPI automation, Health Index computation, and SendGrid-powered email reports with inline data visualizations.
- Built a **dual-framework testing architecture** (Selenium XML + Playwright) supporting multi-browser, multi-environment parallel execution for enterprise-scale test coverage.
- Pioneered **AI/LLM test automation** at EY using DeepEval, implementing bias, toxicity, and PII-leakage safety checks for generative AI workflows.
