

DVSD SIVA PRASAD

Senior Cloud Engineer | .NET & Azure Developer

📍 Hyderabad, India | 📅 9+ Years Experience

PROFESSIONAL SUMMARY

Senior Cloud Engineer with **9+ years** of experience designing and modernizing enterprise applications on **.NET** and **Microsoft Azure** across Utilities and Retail domains. Delivered cloud-native web solutions using **ASP.NET Core, Web API, Blazor/React, Azure Functions, Cosmos DB**, and **Azure DevOps CI/CD**, with strong focus on reliability, testability (**85%+ unit test coverage**), and production support readiness.

CORE SKILLS

Languages:	C#, SQL
Frameworks / UI:	.NET, ASP.NET Core MVC, Web API, Blazor, React, WPF, DevExpress
Azure Services:	App Service, Azure Functions, API Management (APIM), Cosmos DB, Storage, Key Vault, Application Insights
DevOps / Tools:	Azure DevOps (Pipelines/Boards), Git, Bitbucket, Postman, Swagger
Architecture:	Microservices, CI/CD, TDD, Monitoring & Diagnostics

CERTIFICATIONS

- Microsoft Certified: **Azure Developer Associate** AZ-204
- Microsoft Certified: **Azure Fundamentals** AZ-900

PROFESSIONAL EXPERIENCE

Senior Cloud Engineer

September 2022 – May 2026

JU Portal Replacement — PGE (Pacific Gas & Electric)

- Built and enhanced a **Joint Use partner portal** using ASP.NET Core MVC and Web API to support permitting/violation workflows for utility partners.
- Integrated enterprise system-of-record data from **Maximo via REST APIs** to enable validated, end-to-end business processes.
- Improved code reliability and change confidence by implementing **NUnit tests with 85%+ unit test coverage** for core services.
- Migrated database logic into **Azure Function Apps** to decouple heavy operations from the application layer and improve maintainability.
- Implemented audit-ready observability using **Azure Application Insights** (logging, diagnostics) to accelerate incident triage and production support.

Full Stack Developer

January 2022 – June 2022

MCOR — Meijer

- Delivered **MVP features and ongoing enhancements** for a merchandising application used for daily store order review.
- Resolved defects and improved user workflows through targeted **UI enhancements and backend updates** in a sprint-based delivery model.
- Worked with **Azure services and Cosmos DB** and supported CI/CD pipelines to enable reliable releases.

Developer

August 2021 – January 2022

Alcohol Price Management

- Enhanced a **WPF-based internal application** by building UI improvements with DevExpress components to improve usability and consistency.
- Supported backend updates by contributing to **API and stored procedure enhancements** aligned with business changes.

Full Stack Developer

May 2018 – May 2021

MWS — Meijer

- Modernized **legacy PowerBuilder/C++ applications** into a .NET Blazor solution using DevExpress, improving maintainability and enabling web delivery.
- Developed **Azure Functions, Web APIs, and Cosmos DB** integrations to support warehouse workflows across multiple operational modules.
- Converted database procedures into **serverless functions** and integrated them with UI flows to reduce coupling and simplify deployments.
- Supported **automated deployments** using Azure DevOps pipelines to improve release consistency.
